D2-G · 24+42 | 24+47

other display sizes on request

Ready for the **PRIME365** integration solution.

typical configuration

The new S·CAPE® glass front **MULTICONSOLE** features a one-piece glass front meeting the highest hygienic standards and optionally features multi-touch operation.

The glass front is resistant to cleaning agents and ageing. Contaminants are easy to remove from the smooth and hygienic front surface. The optional multi-touchscreen is useable with gloves, accepts 10-finger inputs simultaneously and 2-finger gestures.

Tailored to fit your needs with:

- optional display sizes and technologies
- a variety of input and output add-ons
- flush installation
- self-contained in-wall design enabling a »zero footprint« deployment

Provides display of medical information and image data simultaneously.

Interface
internal / external

The MULTICONSOLE is your entrance into the MMC family with PRIME365 software.

With the integration of additional modules you can enlarge your **MULTICONSOLE** to a central control unit in the O.R.**

Thanks to the new **PRIME365** software solution the surgical team always has the maximum amount of clinical information at hand. **PRIME365** arranges a more efficient flow of clinical data in and outside of the O.R. It is operated via touch and/or keyboard.

Your modular digital
O.R. integration solution.

- + Viewing of additional video sources
- + Video-routing
- + Image processing and archiving
- + Communication and/or integration with HIS-/PACS systems
- + Video-streaming and/or video-conferencing
