

S·CAPE[®] is a surgical technology workflow provider. Our perioperative solutions, branded caresyntax[®], reduce unproductive time and deliver better care in hospitals in over 10 million procedures a year. caresyntax[®] enhances concepts of integrated operating room medical devices and workflows by applying a unique vendor-neutral Internet of Medical Things (IoT) approach to the entire horizontal peri-procedural workflow. We have set new standards in 42 countries and in more than 6,000 digital operating theatres. S·CAPE[®] is headquartered in Berlin with regional offices in France, the UK, Singapore, Lebanon, Turkey and the USA. caresyntax[®] solutions are built and deployed in collaboration with many of the leading vendors in surgical medical device, healthcare IT, and hospital infrastructure fields. We pride ourselves to be a truly international company with over 80 employees from 20 different nationalities.

We are looking for an ambitious individual to fill the following position in Berlin as soon as possible:

Software Product Manager (m/f)

Main tasks:

- Source product and feature ideas from customers, competitors, sales team, your own know-how of technology trends (including in other industries) and your imagination
- Gain a deep understanding of customer experience and generate user and technical requirements, use case scenarios
- Research and test for viability of the product in the market and profitability
- Coordinate software development team in an agile development mode
- Create a long-term strategy for the product's evolution in the market
- Scope and prioritize features based on strategic objectives, business and customer impact
- Produce Product Marketing documents (e.g., product positioning, competitive analysis)
- Establish the right business model for your products (e.g., Software As a Service), define and iterate on pricing options
- Support sales team with the necessary product knowledge and technical expertise

Your experience:

- Academic degree, e.g. computer science, innovation management or comparable qualification with a focus on the relevant technical domains with several years of relevant work experience
- Proven skills and track record in software product management ideally in a healthcare IT company
- Strong ownership, entrepreneurial mindset and organizational skills: you are flexible and are comfortable with changing priorities
- Creative and out-of-the-box thinker: you are the voice and the CEO of your product
- Strong passion for technology, software and great user experiences, experience with SAAS is a plus
- Fluent in English; knowledge of German is preferred, but not required

Why work for us?

We are a hyper-growth global venture-backed company focused on disruptive data-driven innovation in surgical services. Our ambition is to help form a new Smart Surgery ecosystem, driven by automation, predictive AI algorithms, and augmented visualization. The launch of the Prime 365 SaaS suite is a major milestone in this direction. We are set forth to help change the way healthcare is delivered and looking to have enthusiastic team members. By being part of our team, you will contribute to our mission. You will have a chance to be part of a fast-paced entrepreneurial setup with flat hierarchy and high upward mobility prospects. As the company grows, your contribution, responsibilities and authority can scale proportionally.

Please send your documents stating your salary expectations as well as your earliest possible starting date by e-mail to:
